THE GAME

The great wizard ZOR has given you a shiny new SCEPTRE star-craft fitted with the very latest Plasma Orb generating reactor.

Your objective is to battle through the many levels in order to reach the final screen and dock with your waiting mother-ship.

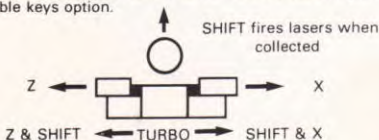

To complete a level you must destroy all the coloured blocks on that grid. This is achieved by bouncing the orb off your moveable SCEPTRE so that it collides with each component block of the grid. Once the grid is clear you will be transported to the next one.

Hidden inside some of the blocks are icons which when collected give your SCEPTRE special powers, press COPY once the game has loaded to see the kind of icons available.

CONTROLS

The keyboard control keys may be redefined by pressing DEL on the title page.

To use a joystick you must first define the directions using the redefinable keys option.
